

# American Time Use Survey (ATUS) Data Dictionary:

2024 Interview Data

Variables collected in ATUS

June 2025

The American Time Use Survey (ATUS) is sponsored by the Bureau of Labor Statistics  
and conducted by the U.S. Census Bureau.

## Important Information about the ATUS Data Dictionary

### Introduction

The American Time Use Survey (ATUS) is sponsored by the Bureau of Labor Statistics and conducted by the U.S. Census Bureau. The purpose of this document is to provide information about the variables available on six of the 2024 ATUS data files: the Respondent file, the Roster file, the Activity file, the Who file, the Eldercare Roster file, and the Activity Summary file. These files contain information collected and assigned in the 2024 ATUS interviews.

This data dictionary lists all the variables available on these files and their valid values. It also provides directions on how to read the data dictionary.

Two additional data dictionaries describe other ATUS data files:

- 2024 ATUS-CPS Data Dictionary: Describes the variables available on the ATUS-CPS file as well as some variables on the Activity Summary file. The ATUS-CPS file contains data from the Current Population Survey (CPS) for persons selected to be surveyed for the ATUS and for members of their households. (The information on the ATUS-CPS file was collected two to five months before the ATUS interview and in some cases was out of date at the time the ATUS was conducted.)
- 2024 ATUS Survey Methodology Data Dictionary: Describes the variables available on the Case History file and the Call History file.

These additional data dictionaries are available on the ATUS Web site at [www.bls.gov/tus/dictionaries.htm](http://www.bls.gov/tus/dictionaries.htm).

### ATUS Interview Data Files

The following six data files include data available from the ATUS interviews.

#### 1. ATUS Respondent File

This file contains case-specific variables collected in ATUS (that is, variables for which there is one value for each respondent). These include, for example, labor force and earnings information, total time providing secondary childcare, total time providing eldercare, and ATUS statistical weights.

There is one record for each ATUS respondent.

Below is a simplified example. The TUCASEID identifies each household, and TULINENO identifies each individual within the household. The example contains responses from five individuals; note that the respondent always has TULINENO=1. In the example, each respondent has corresponding values denoting school enrollment (TESCHENR), labor force status (TELFS), and total time spent alone (TRTALONE). The actual ATUS Respondent file contains many more variables as well as many more lines.

TUCASEID	TULINENO	TESCHENR	TELFS	TRTALONE
20240101020240	1	1	1	40
20240101020241	1	1	1	350
20240101020242	1	1	5	0
20240101020243	1	2	5	556
20240101020244	1	1	4	100

#### 2. ATUS Roster File

This file contains information on the age, sex, and each household member's relationship to the ATUS respondent. The same information is also included for the respondent's own nonhousehold children under 18.

There is one record for each individual in the respondent's household (including the respondent's own nonhousehold children under 18).

A simplified example appears below. The TUCASEID identifies each household, and the TULINENO identifies each individual in the household. In the example below, TUCASEID 20240101020240 has three persons residing in the household, TUCASEID 20240101020241 has two persons in the household, and TUCASEID 20240101020242 has one person. The actual ATUS Roster file contains more variables and many additional lines.

TUCASEID	TULINENO	TERRP	TESEX	TEAGE
20240101020240	1	18	2	42
20240101020240	2	20	1	45
20240101020240	3	22	1	11
20240101020241	1	18	1	65
20240101020241	2	20	2	72
20240101020242	1	18	2	21

### 3. ATUS Activity File

This file includes activity-level information collected in ATUS, including activity code, location, duration, activity start and stop times, whether respondents had a child under 13 in their care during the activity, and whether the activity was identified as eldercare. Location (or “where”) information is not collected for some selected activities (such as sleeping and grooming); a value that indicates the activity was “out of universe” for the “where” question (-1) is filled in these situations.

There is one record for each activity.

A simplified example of the ATUS Activity file appears below. This is an illustration of one respondent’s day. Because only one person is interviewed per household, each TUCASEID on the Activity file identifies a respondent. Each activity is identified by an activity number (TUACTIVITY\_N). The ATUS Activity file contains more variables describing each activity as well as many more lines than does the example below.

TUCASEID	TUACTIVITY_N	TUSTARTTIM	TUSTOPTIME
20240101020240	1	04:00:00	07:00:00
20240101020240	2	07:00:00	07:30:00
20240101020240	3	07:30:00	08:00:00
20240101020240	4	08:00:00	12:00:00
20240101020240	5	12:00:00	13:30:00
20240101020240	6	13:30:00	17:30:00
20240101020240	7	17:30:00	18:00:00
20240101020240	8	18:00:00	19:00:00
20240101020240	9	19:00:00	21:00:00
20240101020240	10	21:00:00	04:00:00

### 4. ATUS Who File

This file includes codes that indicate who was present during each activity.

There is one record for each “who” code reported. Therefore, there will be one record for activities done alone and multiple records for activities with multiple people present. For some activities, no “who” codes are collected (such as sleeping and grooming); a value that indicates the activity was “out of universe” for the “who” question (-1) is filled in these situations.

A simplified example appears below. In the first activity (TUACTIVITY\_N = 1), no “who” code information was collected because of the associated activity code. Only one person was with the respondent during the second activity, so there is one line for TUACTIVITY\_N = 2. Three people were with the respondent during the third activity, so there are three lines for TUACTIVITY\_N = 3. Two of those (TUWHO\_CODE = 20 and 22) are members of the respondent’s household and can be linked to the Roster file using TUCASEID and TULINENO.

The third (TUWHO\_CODE = 51) is not a member of the respondent's household and thus does not have a positive value for TULINENO.

The actual ATUS Who file contains more variables for each line as well as many additional lines than the example below.

TUCASEID	TUACTIVITY_N	TUWHO_CODE	TULINENO
20240101020240	1	-1	-1
20240101020240	2	22	3
20240101020240	3	20	2
20240101020240	3	22	3
20240101020240	3	51	-1

## 5. ATUS Eldercare Roster File (new in 2011)

The ATUS Eldercare Roster file contains information about people for whom the respondent provided care. If the respondent indicated that she had provided eldercare more than once, during the past 3 to 4 months, additional information about each eldercare recipient is collected. (The time frame varied slightly by respondent because the question asked about care provided between the 1<sup>st</sup> of a reference month and the interview day.) There is one record for each recipient, up to a maximum of 5 records for each respondent. Information about the relationship of the recipient to the respondent, the age of the recipient, and the duration that care had been provided appear on the file.

A simplified example of the ATUS Eldercare Roster file appears below. The TUCASEID identifies each respondent providing eldercare, and the TULINENO identifies recipients in the household. A value of -1 for TULINENO indicates that the eldercare recipient does not live in the household. In the example below, TUCASEID 20240101020240 provided care to two persons not living in the household, TUCASEID 20240101020241 provided care to one person, who does live in the household, and TUCASEID 20240101020245 and TUCASEID 20240101020248 each provided care to one person. The actual ATUS Eldercare Roster file contains more variables and many additional lines.

TUCASEID	TULINENO	TEELWHO	TEAGE_EC	TEELDUR
20240101020240	-1	33	76	4
20240101020240	-1	34	80	4
20240101020241	2	20	72	4
20240101020245	-1	46	88	3
20240101020248	-1	55	65	2

## 6. ATUS Activity Summary File

The ATUS Activity Summary file contains information about the total number of minutes each respondent spent doing each activity. The file also includes selected variables from the ATUS Respondent, ATUS Roster, and ATUS-CPS files. **The Activity Summary file contains variables not described in this data dictionary. Variables beginning with a lower-case "t" correspond to specific activity codes; definitions for each activity code can be found in the 2024 Activity Lexicon ([www.bls.gov/tus/lexicons/lexiconwex2024.pdf](http://www.bls.gov/tus/lexicons/lexiconwex2024.pdf)).**

There is one record for each ATUS respondent.

A simplified example of the ATUS Activity Summary file appears below. The variable TUCASEID is the unique identifier for each respondent and the variable TEAGE, which also appears on the ATUS Roster file, shows each respondent's age. The variable t010101 contains the total number of minutes each respondent spent doing activity 010101, "sleeping"; the variable t010102 contains the total number of minutes each respondent spent doing activity 010102, "sleeplessness."

The ATUS Activity Summary file contains more variables describing each activity as well as many more lines than the example below.

TUCASEID	TEAGE	t010101	t010102
20240101020240	26	480	0
20240101020241	53	430	30
20240101020242	76	457	0
20240101020243	16	600	0

## Valid Values

Each variable has a number of valid values or a range of valid values. For example, the variable TESEX has two valid values: 1 for male and 2 for female. The variable TEAGE, on the other hand, has a range of valid values – any entry between 0 and 85 (except 81 through 84) is considered valid. Individual valid values or a range of valid values are listed under each variable in the data dictionary. A few variables have so many valid values that they are not included in the data dictionary; instead, they are provided in an appendix or a separate document. (References to these are included as a “Note” under the relevant variables in the data dictionary.) One example of such a variable is TEIO1ICD, which identifies the industry code of the respondent’s main job.

Many ATUS variables have the following possible valid values:

Value	Description
-1	Blank
-2	Don't know
-3	Refused

Because so many variables have these possible values, they are not shown as valid entries for each variable.

TUCASEID, the primary identification number for ATUS, does not have either a list of valid values or a range of valid values.

## ATUS Naming Conventions and Definitions

ATUS variables are named according to specified rules. Variables with a first character of "T" (for time use) were collected or created through the ATUS interview. Variables with any other first character (most often "P", "G", or "H") were collected or created through the final CPS interview (conducted two to five months prior to the ATUS interview). All of the variables on the ATUS interview data files described in this dictionary begin with "T."

The second and third characters of the name identify the type of variable, and the remaining characters consist of a descriptive name. The rules regarding the first two or three characters are described in the table below (note that the variables on the Activity Summary file that start with a lowercase "t" do not follow these rules):

Abbreviation	Variable Type	Definition
U	Unedited Variable	An unedited variable generally is produced by the Computer Assisted Telephone Interview (CATI) instrument, either collected or assigned during the interview. There are a few unedited variables that are computed by the processing system, such as the ATUS final weight (TUFINLWGT).
E	Edited Variable	An edited variable is one that has gone through an editing process (a process checking for consistency). Values of edited variables are almost always equal to values of the corresponding unedited variables. Data differ when a value is allocated or imputed by the processing system based on allocation rules specified in CPS or ATUS processing. Allocations are typically performed when the unedited variable contains a value of blank, "don't know," or "refused." An edited version of a variable exists only if that variable goes through an editing process. If there are no edits for a variable, then only an unedited version of that variable exists.
R	Recode	A recode is a variable calculated by the processing system from a combination of other variables on the file. For example, TRMJOCC1 is the major occupation code for the respondent's main job; this is not a response to a question but rather a variable that summarizes (or "groups") the more finely detailed occupation variable TEIO1OCD. (Note that variables with second and third characters of "RT" are summary variables.)
RT	Summary Variable	These variables summarize the amount of time respondents spent with other people or did selected activities. For example, TRTALONE gives the total amount of time the respondent spent alone on the diary day. Variables that summarize the amount of time respondents spent with other people rely on "who" code information and therefore do not include activities for which no "who" code information was collected, such as sleeping.
X	Allocation Flag	Each edited variable has a corresponding allocation flag indicating the nature of the allocation. For example, if TUAGE is blank, TEAGE would be allocated, and this would be indicated by a TXAGE value of 41. See the section on allocation flags for the standard list of values.
XT	Summary Allocation Flag	Some summary variables have a corresponding XT variable, which is a 0-1 indicator of whether or not the summary variable contains allocated information. For example, a value of 1 in TXTCC indicates that TRTCC and TRTCC_LN contain allocated rather than calculated data.
T	Topcode Flag	These variables indicate whether another variable has been topcoded, or given a maximum value. The three topcode variables on the ATUS interview data files all relate to earnings.

Using these rules, variables can be more readily understood based on their names. For example, the variable TEAGE can be broken down as follows:

- The first character "T" indicates that this variable was collected or created through the ATUS interviews
- The second character "E" indicates that this variable went through an editing process; it also means that there will be a corresponding allocation flag, TXAGE, to indicate the nature of the allocation
- The final part of the variable name, "AGE," is descriptive

Some questions asked in the ATUS interview allow for more than one response. For such multiple entry questions, there is a separate variable for each possible response. Each variable has the same descriptive name but a different (sequential) number. For example, respondents can provide up to six answers to the question "You said you have been trying to find work – how did you go about looking?" The variable names are TULKDK1, TULKDK2, TULKDK3, etc.

Not all ATUS variables are on the files. When there is an edited variable, the corresponding unedited variable is usually omitted from the files. This is typically done to protect the confidentiality of ATUS respondents as required by law. If an unedited variable is included on the files, then an edited version does not exist and the unedited version cannot be used to identify individual respondents.

## Allocation Flags

For every edited variable (or all "E" variables), there is a corresponding allocation flag whose second character is "X." All remaining characters of the two variables' names are the same. For example, TXSEX is the allocation flag for TESEX.

All allocation flags (except for variables with the second and third characters of "XT") have the following list of possible values:

0	Value – no change
1	Blank – no change
2	Don't know – no change
3	Refused – no change
10	Value to value
11	Blank to value
12	Don't know to value
13	Refused to value
20	Value to longitudinal value
21	Blank to longitudinal value
22	Don't know to longitudinal value
23	Refused to longitudinal value
30	Value to allocated longitudinal value (unused)
31	Blank to allocated longitudinal value (unused)
32	Don't know to allocated longitudinal value (unused)
33	Refused to allocated longitudinal value (unused)
40	Value to allocated value
41	Blank to allocated value
42	Don't know to allocated value
43	Refused to allocated value
50	Value to blank
52	Don't know to blank
53	Refused to blank

Each digit of these valid values identifies how and why edited variables were allocated.

The first digit indicates how the allocation was made to the "E" (or edited) variable.

First Digit	
0 or Blank	No change between "U" variable and "E" variable
1	"E" variable changed to a value
2	"E" variable changed to a longitudinal value (the corresponding value from the CPS data)
3	"E" variable changed to an allocated longitudinal value (the corresponding allocated value from CPS data) - unused
4	"E" variable changed to allocated value
5	"E" variable changed to a blank

The second variable indicates why the “U” variable was allocated, whether the value was changed, missing, don’t know, or refused.

Second Digit	
0	“U” variable was equal to some value
1	“U” variable was blank (or -1)
2	“U” variable was don’t know (or -2)
3	“U” variable was refused (or -3)

Two of the “X” allocation flags have more values than those listed above: TXAGE and TXAGE\_EC. There are two additional values to indicate that TEAGE or TEAGE\_EC has been topcoded or given a maximum value. These values are listed in the data dictionary.

Two other variables (TRWERNAL and TRHERNAL) indicate allocation and do not follow the “X” variable values; these variables have values of either 0 or 1, with 1 indicating that other variables (TRERNWA and TRERNHLY, respectively) have been allocated.

Additionally, the “XT” variables do not have the standard “X” variable values. Like the two variables indicated above, these variables all have values of either 0 or 1, with 1 indicating that another variable has been allocated.

### Edited Universe

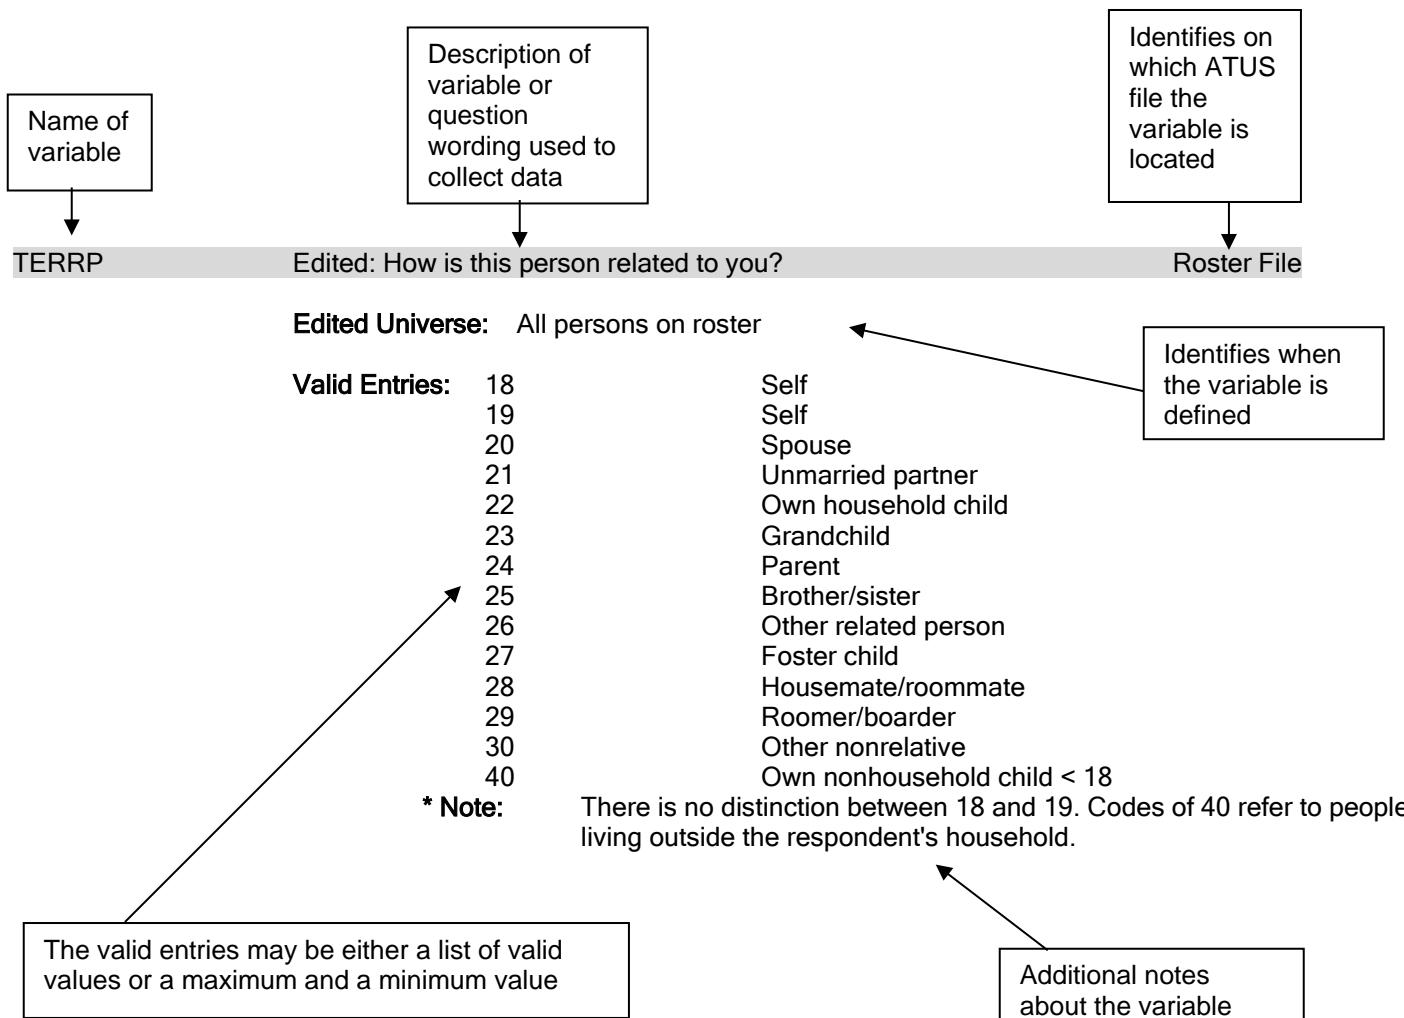

Edited variables and recodes are defined for certain universes, and these are listed in the data dictionary. For example, TEIO1OCD (occupation code) is only defined when the respondent is employed. Therefore, the universe for TEIO1OCD is TELFS = 1 or 2 (TELFS is the labor force status of the respondent, and values of 1 or 2 indicate that the respondent is employed).

Certain variables might initially appear to be the same because their descriptions are very similar. These variables are different in that they were asked of different groups of survey respondents. For example, the variables TEERNH1O and TEERNH2 both have the same question text of “Excluding overtime pay, tips, and commissions, what is your hourly rate of pay on your main job?” The difference in these two variables has to do with which respondents were asked each question. This can be determined by looking at the edited universes. TEERNH1O was asked of respondents with TEERNPER = 1, or those who said it was easiest to report their earnings hourly. TEERNH2, on the other hand, was asked of respondents with TEERNRT = 1, or those who said they were paid hourly but reported their earnings another way.

## Organization of the Data Dictionary

Variables are listed in the data dictionary in alphabetical order.

Below is a sample entry from the ATUS interview data dictionary:

## Frequently Used Variables

The ATUS files have many variables and users may sometimes have difficulty determining which variables to use. A list of the most commonly used ATUS variables is available at [www.bls.gov/tus/other-documentation/freqvariables.pdf](http://www.bls.gov/tus/other-documentation/freqvariables.pdf).

## Linking ATUS Files

Each of the ATUS files contains useful information, but in order to produce most estimates, the files must be linked. All of the files contain the variable TUCASEID, which is the ATUS identification number. Two other variables that can be used for linking in conjunction with TUCASEID are TULINENO (person line number) and TUACTIVITY\_N (activity line number). More information on linking ATUS files is available on the ATUS Web site at [www.bls.gov/tus/other-documentation/howto.htm#linking](http://www.bls.gov/tus/other-documentation/howto.htm#linking).

For information on linking ATUS files to CPS files, see Appendix K-L of the ATUS User's Guide ([www.bls.gov/tus/atususersguide.pdf](http://www.bls.gov/tus/atususersguide.pdf)).

## Changes between years of ATUS data

Those wishing to combine multiple years of ATUS data should be aware of changes to ATUS survey methods between years—such as new, discontinued, and changed variables—as well as differences in activity codes between years. For a list of these changes, see the document describing ATUS changes ([www.bls.gov/tus/other-documentation/changes.pdf](http://www.bls.gov/tus/other-documentation/changes.pdf)) and the document describing Activity Coding Lexicon changes ([www.bls.gov/tus/lexicons/lexiconchanges.pdf](http://www.bls.gov/tus/lexicons/lexiconchanges.pdf)).

## Statistical weights for the annual ATUS Data

For more information about ATUS population weights, why researchers should use them, and details about how the ATUS weighting method changed, see Chapter 7 of the ATUS User's Guide ([www.bls.gov/tus/atususersguide.pdf](http://www.bls.gov/tus/atususersguide.pdf)).

## 2024 ATUS Data Dictionary: Public ATUS Interview Data

Name	Description			File
TEABSRSN	Edited: what was the main reason you were absent from your job last week?			Respondent File
	<b>Edited Universe:</b>	TELFS = 2		
	<b>Valid Entries:</b>	1	On layoff (temporary or indefinite)	
		2	Slack work/business conditions	
		3	Waiting for a new job to begin	
		4	Vacation/personal days	
		5	Own illness/injury/medical problems	
		6	Childcare problems	
		7	Other family/personal obligation	
		8	Maternity/paternity leave	
		9	Labor dispute	
		10	Weather affected job	
		11	School/training	
		12	Civic/military duty	
		13	Does not work in the business	
		14	Other	
Name	Description			File
TEAGE	Edited: age			Roster File, Activity Summary File
	<b>Edited Universe:</b>	All persons on roster		
	<b>Valid Entries:</b>	0 85	Min Value Max Value	
	<b>*Note</b>	TEAGE is topcoded to 85. All those age 80 through 84 have TEAGE = 80. Those age 85 or above have TEAGE = 85. TXAGE indicates topcoding.		
Name	Description			File
TEAGE_EC	Edited: age of eldercare recipient			EC Roster File
	<b>Edited Universe:</b>	All eldercare recipients		
	<b>Valid Entries:</b>	0 85	Min Value Max Value	
	<b>*Note</b>	For household members, this is the age on the diary day; for nonhousehold members it's the person's age on the first of the month for the month corresponding to 3 months before the interview.  TEAGE_EC is topcoded to 85. All those age 80 through 84 have TEAGE_EC = 80. Those age 85 or above have TEAGE_EC = 85. TXAGE_EC indicates topcoding.		

## 2024 ATUS Data Dictionary: Public ATUS Interview Data

Name	Description			File
TEELDUR	Edited: how long have you provided care to [NAME]?			EC Roster File
	<b>Edited Universe:</b>	All eldercare recipients		
	<b>Valid Entries:</b>	1	0 to 5 months	
		2	6 to 11 months	
		3	1 year	
		4	More than a year	
	<b>*Note</b>	The name is filled with the information collected from the TUELWHO question		

## 2024 ATUS Data Dictionary: Public ATUS Interview Data

Name	Description			File
TEELWHO	Edited: who did you give this care to?			EC Roster File
	<b>Edited Universe:</b>	All eldercare recipients		
	<b>Valid Entries:</b>	20	Spouse	
		21	Unmarried partner	
		22	Own household child	
		23	Grandchild	
		24	Parent	
		25	Brother/sister	
		26	Other related person	
		27	Foster child	
		28	Housemate/roommate	
		29	Roomer/boarder	
		30	Other nonrelative	
		33	Mother	
		34	Father	
		35	Spouse

## 2024 ATUS Data Dictionary: Public ATUS Interview Data

Name	Description			File
TRERNHLY	Hourly earnings at main job (2 implied decimals)			Respondent File
	<b>Edited Universe:</b>	TEERNHRY = 1		
	<b>Valid Entries:</b>	0 9999	Min Value Max Value	
	<b>*Note</b>	This is the most-frequently used hourly earnings variable in ATUS and is only defined for employed persons who say they work hourly and are not self-employed or without pay. The allocation flag for this variable is TRHERNAL. Subject to topcoding based on the entry in TEERNHRO such that TEERNHRO x TRERNHLY <= 2884.61; topcoding is indicated in TTMR.		
Name	Description			File
TRERNUPD	Earnings update flag			Respondent File
	<b>Edited Universe:</b>	TELFS = 1 or 2 and TEIO1COW = 1 - 5		
	<b>Valid Entries:</b>	0	Earnings carried forward from final CPS interview	
		1	Earnings updated in ATUS	
Name	Description			File
TRERNWA	Weekly earnings at main job (2 implied decimals)			Respondent File, Activity Summary File
	<b>Edited Universe:</b>	TELFS = 1 or 2 and TEIO1COW = 1 - 5		
	<b>Valid Entries:</b>	0 9999999	Min Value Max Value	
	<b>*Note</b>	This is the most-frequently used earnings variable in ATUS and is defined for all employed persons who are not self-employed or without pay. The allocation flag for this variable is TRWERNAL. Subject to topcoding (the maximum value cannot be greater than 2884.61); topcoding is indicated in TTOT, TTWK, and TTMR. Starting in June 2024, new rules were applied to TRERNWA such that the topcode values generally correspond to the top 3 percent in a given month.		
Name	Description			File
TRHERNAL	TRERNHLY: allocation flag			Respondent File
	<b>Edited Universe:</b>	TEERNHRY = 1		
	<b>Valid Entries:</b>	0	TRERNHLY does not contain allocated information	
		1	TRERNHLY contains allocated information	
Name	Description			File

## 2024 ATUS Data Dictionary: Public ATUS Interview Data

Name	Description			File
TRTHH_LN	Total time spent during activity providing secondary childcare for household children < 13 (in minutes)			Activity File
	<b>Edited Universe:</b>	All activities for respondents with at least one household child < 13		
	<b>Valid Entries:</b>	0 1440	Min Value Max Value	
	<b>*Note</b>	TRTHH_LN is the maximum for the activity of the following variables: TRTOHH_LN and TRTNOHH_LN		
Name	Description			File
TRTHHFAMILY	Total nonwork-related time respondent spent with household family members (in minutes)			Respondent File
	<b>Edited Universe:</b>	All respondents		
	<b>Valid Entries:</b>	0 1440	Min Value Max Value	
	<b>*Note</b>	This variable is computed using TUWHO_CODE information; time spent working and all activities for which who information is not collected, such as sleeping, are omitted from the calculation		
Name	Description			File
TRTIER2	First and second activity tiers			Activity File
	<b>Edited Universe:</b>	All activities		
	<b>*Note</b>	This variable includes information from TUTIER1CODE and TUTIER2CODE		
Name	Description			File
TRTNOCHILD	Total nonwork-related time respondent spent with nonown children < 18 (in minutes)			Respondent File
	<b>Edited Universe:</b>	All respondents		
	<b>Valid Entries:</b>	0 1440	Min Value Max Value	
	<b>*Note</b>	This variable is computed using TUWHO_CODE information; time spent working and all activities for which who information is not collected, such as sleeping, are omitted from the calculation		
Name	Description			File
TRTNOHH	Total time spent during diary day providing secondary childcare for nonown household children < 13 (in minutes)			Respondent File
	<b>Edited Universe:</b>	All respondents		
	<b>Valid Entries:</b>	0 1440	Min Value Max Value	
	<b>*Note</b>	TRTNOHH is the sum of all values of TRTNOHH_LN for each TUCASEID		

## 2024 ATUS Data Dictionary: Public ATUS Interview Data

Name	Description			File
TRTNOHH_LN	Total time spent during activity providing secondary childcare for nonown household children < 13 (in minutes)			Activity File
	<b>Edited Universe:</b>	All activities for respondents with at least one nonown household child < 13		
	<b>Valid Entries:</b>	0 1440	Min Value Max Value	
	<b>*Note</b>	TRTNOHH_LN is calculated using TUCC5B. It does not include activities with activity codes of 0101xx, 0301xx, 0302xx, 0303xx, 180301, 180302, or 180303. It also does not include any activity or part of any activity in which no household child was awake (determined by TUCC2 and TUCC4). TXTNOHH is the allocation flag for this variable.		
Name	Description			File
TRTO	Total time spent during diary day providing secondary childcare for own children < 13 (in minutes)			Respondent File
	<b>Edited Universe:</b>	All respondents		
	<b>Valid Entries:</b>	0 1440	Min Value Max Value	
	<b>*Note</b>	TRTO is the sum of all values of TRTO_LN for each TUCASEID		
Name	Description			File
TRTO_LN	Total time spent during activity providing secondary childcare for own children < 13 (in minutes)			Activity File
	<b>Edited Universe:</b>	All activities for respondents with at least one own child < 13		
	<b>Valid Entries:</b>	0 1440	Min Value Max Value	
	<b>*Note</b>	TRTO_LN is the maximum for the activity of the following variables: TRTOHH_LN and TRTONHH_LN		
Name	Description			File
TRTOHH	Total time spent during diary day providing secondary childcare for own household children < 13 (in minutes)			Respondent File
	<b>Edited Universe:</b>	All respondents		
	<b>Valid Entries:</b>	0 1440	Min Value Max Value	
	<b>*Note</b>	TRTOHH is the sum of all values of TRTOHH_LN for each TUCASEID		
Name	Description			File
TRTOHH_LN	Total time spent during activity providing secondary childcare for own household children < 13 (in minutes)			Activity File
	<b>Edited Universe:</b>	All activities for respondents with at least one own household child < 13		
	<b>Valid Entries:</b>	0 1440	Min Value Max Value	
	<b>*Note</b>	TRTOHH_LN is calculated using TUCC5. It does not include activities with activity codes of 0101xx, 0301xx, 0302xx, 0303xx, 180301, 180302, or 180303. It also does not include any activity or part of any activity in which no household child was awake (determined by TUCC2 and TUCC4). TXTTOHH is the allocation flag for this variable.		

## 2024 ATUS Data Dictionary: Public ATUS Interview Data

Name	Description			File
TRTOHHCHILD	Total nonwork-related time respondent spent with own household children < 18 (in minutes)			Respondent File
	<b>Edited Universe:</b>	All respondents		
	<b>Valid Entries:</b>	0 1440	Min Value Max Value	
	<b>*Note</b>	This variable is computed using TUWHO_CODE information; time spent working and all activities for which who information is not collected, such as sleeping, are omitted from the calculation		
Name	Description			File
TRTONHH	Total time spent during diary day providing secondary childcare for own nonhousehold children < 13 (in minutes)			Respondent File
	<b>Edited Universe:</b>	All respondents		
	<b>Valid Entries:</b>	0 1440	Min Value Max Value	
	<b>*Note</b>	TRTONHH is the sum of all values of TRTONHH_LN for each TUCASEID		
Name	Description			File
TRTONHH_LN	Total time spent during activity providing secondary childcare for own nonhousehold children < 13 (in minutes)			Activity File
	<b>Edited Universe:</b>	All activities for respondents with at least one own nonhousehold child < 13		
	<b>Valid Entries:</b>	0 1440	Min Value Max Value	
	<b>*Note</b>	TRTONHH_LN is calculated using TUCC7. It does not include activities with activity codes of 0101xx, 0301xx, 0302xx, 0303xx, 0401xx, 0402xx, 0403xx, 180301, 180302, 180303, 180401, 180402, or 180403. TXTONHH is the allocation flag for this variable.		
Name	Description			File
TRTONHHCHILD	Total nonwork-related time respondent spent with own nonhousehold children < 18 (in minutes)			Respondent File
	<b>Edited Universe:</b>	All respondents		
	<b>Valid Entries:</b>	0 1440	Min Value Max Value	
	<b>*Note</b>	This variable is computed using TUWHO_CODE information; time spent working and all activities for which who information is not collected, such as sleeping, are omitted from the calculation		
Name	Description			File
TRTSPONLY	Total nonwork-related time respondent spent with spouse only (in minutes)			Respondent File
	<b>Edited Universe:</b>	All respondents		
	<b>Valid Entries:</b>	0 1440	Min Value Max Value	
	<b>*Note</b>	This variable is computed using TUWHO_CODE information; time spent working and all activities for which who information is not collected, such as sleeping, are omitted from the calculation		

## 2024 ATUS Data Dictionary: Public ATUS Interview Data

Name	Description			File
TRTSPOUSE	Total nonwork-related time respondent spent with spouse (others may be present) (in minutes)			Respondent File
	<b>Edited Universe:</b>	All respondents		
	<b>Valid Entries:</b>	0 1440	Min Value Max Value	
	<b>*Note</b>	This variable is computed using TUWHO_CODE information; time spent working and all activities for which who information is not collected, such as sleeping, are omitted from the calculation		
Name	Description			File
TRTUNMPART	Total nonwork-related time respondent spent with unmarried partner (others may be present) (in minutes)			Respondent File
	<b>Edited Universe:</b>	All respondents		
	<b>Valid Entries:</b>	0 1440	Min Value Max Value	
	<b>*Note</b>	This variable is computed using TUWHO_CODE information; time spent working and all activities for which who information is not collected, such as sleeping, are omitted from the calculation		
Name	Description			File
TRWERNAL	TRERNWA: allocation flag			Respondent File
	<b>Edited Universe:</b>	TELFS = 1 or 2 and TEIO1COW = 1 - 5		
	<b>Valid Entries:</b>	0	TRERNWA does not contain allocated information	
		1	TRERNWA contains allocated information	
Name	Description			File
TRWHONA	Who information not asked for activity			Who File
	<b>Edited Universe:</b>	All activities		
	<b>Valid Entries:</b>	0	TUWHO_CODE asked	
		1	TUWHO_CODE not asked	
Name	Description			File
TRYHHCHILD	Age of youngest household child < 18			Respondent File, Activity Summary File
	<b>Edited Universe:</b>	TRHHCHILD = 1		
	<b>Valid Entries:</b>	0 17	Min Value Max Value	
Name	Description			File
TTHR	Hourly pay topcode flag			Respondent File
	<b>Valid Entries:</b>	0	Not topcoded	
		1	Topcoded	
	<b>*Note</b>	Indicates topcoding of hourly pay in earnings variables		

## 2024 ATUS Data Dictionary: Public ATUS Interview Data

Name	Description			File
TTOT	Overtime amount topcode flag			Respondent File
	<b>Valid Entries:</b>	0	Not topcoded	
		1	Topcoded	
	<b>*Note</b>	Indicates topcoding of overtime pay in earnings variables		
Name	Description			File
TTWK	Weekly earnings topcode flag			Respondent File
	<b>Valid Entries:</b>	0	Not topcoded	
		1	Topcoded	
	<b>*Note</b>	Indicates topcoding of weekly pay in earnings variables		
Name	Description			File
TUABSOT	In the last seven days, did you have a job either full or part time?			Respondent File
	<b>Valid Entries:</b>	1	Yes	
		2	No	
		3	Retired	
		4	Disabled
